Declination of Repair Waiver

We have discovered unforeseen damage to one or more of the following areas indicated by a check mark below:

- Pool Shell has structural crack(s) that need to be repaired before further work is done to pool. This is to ensure proper adhesion and longevity out of new plaster application and to eliminate pool leaking due to the crack(s) we found. This repair is required in order to receive the plaster manufacturer's warranty as well as Z&Z Pools limited workmanship warranty.
- Pool plaster has more than 50% delaminated from the shell. A complete chip out of all previous plaster applications needs to be done to protect the integrity of the new application and ensure that it is done properly in order to receive both the plaster manufacturer's warranty as well as Z&Z Pools limited workmanship warranty.

By signing below, the homeowner, or otherwise responsible party for authorizing any such work done to the home or pool, acknowledges and releases Z&Z Pools from any liability as result of sustained and/or further damage to one or more of the areas stated above. Furthermore, you acknowledge that the plaster manufacturer's warranty and Z&Z Pools limited workmanship warranty is voided as of the date of this waiver.
